Healthy skin systematically

plum

Healthy skin is a healthy investment

At Plum we work for your hands. We know they need protection and prefer to avoid harsh cleaning agents. They need after-care, so that your skin is always soft and supple. Before, during and after work. So that is why all our products are made with a single aim – to create the best possible hand hygiene. They ensure protection, cleanliness and care, gently but effectively.

To achieve these results we have worked for many years together with dermatologists, safety organisations and Occupational Health Service centres. Besides this we have worked for over 40 years to help companies and institutions to optimise hand hygiene.

Environment-friendly products

We make a point of ensuring that all our products and packaging are safe for the environment. We hold the ISO 14001 certificate, and our products carrying the Nordic Council's Nordic Swan label offer you an environment-conscious option.

Documentation

You can request a data sheet on any of our products in accordance with the EU directive on cosmetics. We have additionally tested many of our soaps and creams, so that we can document how mild they are. The data sheets and documentations will be sent free on request. Our quality system is built on ISO 22716 and ISO 9001 and is your guarantee that you always get the same high-quality product – and every product has been correctly researched and produced.

Healthy skin systematically

Optimal hand hygiene goes through three stages: skin care before work, cleaning the skin, and skin care after work. Use the product guide on the next page to give an indication of which products will help you best, depending on what your skin is exposed to under your working conditions. If you are in doubt as to which category covers your situation, you are welcome to contact us for further advice and guidance.

	Ordinary daily hand washing		Nature Mild	
	For hair washing and baths		Nature Hair & Body	

Skin care before work

Using a skin care cream before work prevents your skin from drying up and reduces the risk of harmful substances penetrating deeply into the skin.

At the same time it makes cleansing your skin easier after work. The cream must be suited to your working conditions.

Skin care before work

<p>Plutect Aqua</p>		<p>Packaging 100 ml tube 0.7 l bag-in-box</p>	<p>Art. No. 2231 2204</p> <p>Cream for skin care before and during work with water and water-based substances. Without perfume. To be applied to clean, dry hands.</p> <p>Dispenser type: MP2000, StandardPlum</p>

Protects against the sun's UVA and UVB radiation. The Sun cream is easy to apply and absorbs easily into the skin. The Sun cream also restores the natural barrier function of the skin. The product has the Nordic Swan label and does not contain parabens, perfume or colour.</p> 

Disinfection

If you are working in areas where there is an increased risk for contamination and high standards of hygiene are required, you must use a hand disinfectant for the removal of bacteria and viruses from the skin. The hands are the greatest source of infection and frequent hand washing and hand disinfection

is a must for employees in the health sector and in the food industry. To minimize the risk of transmission of bacteria and viruses an alcohol-based hand disinfection is documented to be an effective product.

Disinfection

<p>Disinfectant 70%, gel</p>		<p>Packaging 120 ml bottle 1.0 l bag 1.0 l bag-in-box</p> <p>Art. No. 3728 3736 3720</p>	<p>Disinfectant gel with conditioner. The intensive foam makes skin and hair soft and smooth, and has simultaneously an antistatic effect on hair. Slightly perfumed. Dispenser type: MP2000, StandardPlum, MaxiPlum	 590 050

Skin care after work

We recommend using a regenerative hand cream after work. At that point the skin is left alone to restore its natural moisture and oil balance and prepare for new exposures. It may also be

a good idea to use a skin care cream during the working day if your daily work is tough on your skin.

Creams for skin care after work

Handy Creme		Packaging 100 ml tube 0.7 l bag-in-box	Art. No. 2461 2470	Regenerating skin care cream to restore dry, delicate skin. Without perfume. To be applied to clean, dry hands.	Dispenser type: MP2000, StandardPlum
