when accidents occur

FIRST AID IN ONE PLACE

plum

# Easy access is the key to improved safety

## QuickSafe stores your first aid in one place

Gone are the days of having eye wash bottles here and plasters there, dressings in one place and cleansers in another. With QuickSafe you can store the most important first aid products and place the solution exactly where the products are to be used.

The transparent cover gives you an overview and makes it quick and easy to get to the first aid. You can easily see when the cabinet has to be refilled. With the dust-proof cover and separately packaged products, QuickSafe is both a hygienic and elegant solution.

## One cabinet. Many possibilities.

QuickSafe is a flexible first aid solution that you can easily tailor to your particular needs. The cabinet takes up a little more than an A3 sheet of paper, so you can find space for it on even the most crowded wall.

### With QuickSafe you get:

- All your first aid in one place
- A complete first aid solution that can be easily placed where you need it
- A flexible solution that you can tailor to your own needs
- A safe and manageable solution where the transparent cover makes it easy to see when the station needs to be refilled
- A first aid station that is easy to refill
- A high hygienic standard due to the dust-proof cover and the separately packaged products
- A visible solution in a stylish design clarifying that you take safety seriously

## Maintain the overview and get quick help

### QuickSafe Complete helps you with minor and major accidents

The backbone of the entire QuickSafe program is our acknowledged eye wash products. With QuickSafe Complete you get 2 x 500 ml Plum Eye Wash, 200 ml pH Neutral eye wash bottle for accidents involving acids and alkalis, and 5 QuickRinse eye wash ampoules for the removal of dirt and dust. The advantage of the ampoules is that you do not need to use the entire eye wash bottle if you just have to flush a little dust or dirt out of the eye.

### Wound dressing, plasters and QuickCool

In addition, you get plasters, burn gel that can relieve pain from burns, wound cleansing wipes and a wound dressing kit, which enables you to provide first aid even with severe bleeding such as an arterial bleeding.

- A good all-round solution with help for the most critical situations
- Contains our three new products: QuickCool burn gel QuickRinse eye wash ampoules QuickStop wound dressing kit

Quick help is essential. Not least for accidents that affect the eyes, where every second counts.

## With pH Neutral Duo you can save both eyes

Most mobile eye wash solutions are only intended to flush one eye. But what if the accident has affected both eyes?

Often an accident affects both eyes. Not least accidents with fluids that squirt out of defective taps, tubes or similar. In the case of acids and alkalis, you have a critical eye accident. Here you need pH Neutral Duo. Start the treatment with pH Neutral and

continue with the regular Plum Eye Wash until help arrives. With Duo you rinse both eyes at the same time. Then you are free of the uncomfortable question that you otherwise have to ask yourself or the injured person: Which eye do we save?

## QuickStop wound dressing

Built-in compression that can stop the bleeding

QuickStop is a set of 3 wound dressings. A large wound dressing. It is used for major bleeding such as arterial bleeding. In addition there are two smaller dressings that you can use for minor bleeding. They can also be used in a pocket in the large wound dressing to create the necessary pressure to control an arterial bleeding until help arrives.

## Cooling when you have burned yourself

Fast relief of minor burns increases job satisfaction

In many workplaces there is a risk of minor burns. A hot machine, steam from an electric kettle or dripping in a busy kitchen. QuickCool is the help you have been missing until now. Apply the gel to the skin and get comfortable relief.

## Wound cleansers and plasters for the minor accidents

Clean. Put on a plaster. And quickly back to work

Minor everyday accidents can quickly cause interruption to your work. With QuickSafe it is easy to get it right from the beginning. Clean the wound with QuickClean wound cleansing wipes and put on a QuickFix plaster. The plasters are hygienically and individually packaged.
